

I am concerned about the new Low Power FM issue expansion that is being considered.

I listen to a station (K-LOVE) which transmits on a FM translator.

I would be disheartened if I were to lose K-LOVE's signal!

This is the ONLY radio station I listen to. It uplifts me every morning on my way to work and brings my focus back to GOD.

I live in a small city with a VERY limited selection of music offered on local stations. Without K-LOVE I would have nothing LIVE to listen to!

It is refreshing to listen to a radio station that is family friendly, that calms my soul, and whose songs and DJ's do not promote hate, sex, violence or drug use!!!!

I wonder if a study were done, if it would find that listeners of

K-LOVE are less likely to commit road rage as listeners of country music, rock, or rap stations? Just a thought!

Thank you for listening!
